6.2 Phoenix Data Recovery gives an integrity percentage of any data recovered. This is an estimate only and is derived using specialist software that performs a file signature verification process. This is where the recovered files signatures are matched against their extension. This process does not guarantee the level of integrity and may vary depending on various factors including, but not limited to, the file type and whether or not it is encrypted. The percentage given is an estimate only.

6.3 Phoenix Data Recovery accepts no responsibility or liability whatsoever for the contents, integrity, functionality, corruption or usefulness of the data recovered.

6.4 Whilst every effort is made to recover as much data as possible from any media received and any specific files requested by the client the recovery process is such that it is not specific and the sale of data is generic and based purely on the amount of data recovered and the labour in recovering that data. Therefore, should the client wish to know what files have been recovered they should request a file list from their account manager in writing or by email. This is the client's responsibility and a file list will not be provided unless requested from Phoenix Data Recovery in writing or by email by the client. The file list shows the files recovered. Phoenix Data Recovery gives no guarantee as to the integrity of the data shown on the file list or any other data recovered.
